

AI Nursery

The Future of Plant Shopping & Management

AI Immersion Project

The Problem: Traditional Management

Nursery owners face several challenges in the digital era:

- **Time-Consuming Support:** Customers repeatedly ask basic care questions (watering, sunlight), eating up the owner's valuable time.
- **Scattered Communication:** Enquiries and orders come through scattered channels (WhatsApp, phone calls) and are easily lost.
- **Manual Inventory:** Tracking which plants are in-stock or out-of-stock is entirely manual and error-prone.
- **Complex Checkout:** No streamlined way for customers to browse,

The Solution: AI Nursery Platform

A complete, end-to-end digital storefront and management system.

- **Automated AI Assistant:** An integrated chatbot that instantly answers customer questions about plant care, freeing up the owner.
- **Centralized Admin Dashboard:** A single portal for the owner to manage inventory, track orders, and reply to enquiries.
- **Seamless E-Commerce:** Beautiful catalog with intuitive checkout and automated order tracking for customers.

Key Feature: The AI Assistant

Instead of calling the nursery for basic questions, customers can chat with the AI!

- Can identify plants from images.
- Provides tailored advice on soil, sunlight, and watering based on the specific plant.
- Available 24/7, meaning the business never sleeps and customers always get immediate support.

Key Feature: Order & Enquiry Management

The Admin Dashboard provides full operational control:

- **Order Tracking:** Update statuses from *Pending* to *Processing* to *Delivered*.
- **Enquiry System:** Reply directly to customer questions from the dashboard; customers see the official reply in their profile.
- **Inventory Control:** Instantly update prices, edit details, or mark items as *Out of Stock*.

Conclusion

The **AI Nursery** platform transforms a traditional, manual business into a scalable, automated digital storefront.

By leveraging AI for customer support and a centralized dashboard for operations, the nursery owner can focus on what they do best:

Growing beautiful plants.
